

USER INTERFACE AND USER EXPERIENCE LAB

NAME: SAMYUKTHA MS

REGNO: 23MIS0282

EXPERIMENT -1

Identify and observe bad designs and submit a minimum of 3 to 5 photographs of bad designs in the surrounding, home, product, or neighborhood. Create a Word or PDF report containing:

- Source of photographs (GPS-enabled, own photograph, taken by you)
- Description of the design
- Place (LOCATION)
- Reasons why the design is bad
- Suggested Improvement

Bad Design 1: Hand-Wash Station at the Building Entrance

Source of Photograph: GPS-enabled photograph captured by me.

Description:

A hand-wash station is installed directly beside the entrance of an academic building, causing congestion where students enter and exit.

Place:

SJT Building, VIT University, Vellore.

Reasons why the design is bad:

- Creates crowding at the entrance.
-
- Wet floor increases slipping risk.
-
- Obstructs pedestrian movement.
-
- Poor placement affects accessibility.

Suggested Improvement:

- Move the hand-wash station away from the entrance.
-
- Provide proper drainage.
-
- Add anti-slip flooring.
-
- Install directional signs.
-

Bad Design 2: Bus Stop Without Clear Stop Identification

Source of Photograph: GPS-enabled photograph captured by me.

Description:

The shuttle bus stop lacks a clearly visible stop name or identification board, making it difficult for passengers to recognize the stop.

Place:

Near Suu Kyi Block, VIT University, Vellore.

Reasons why the design is bad:

- Bus stop is difficult to identify.
-
- Confusing for visitors and first-time users.
-
- No prominent route information.
-
- Poor visibility from a distance.

Suggested Improvement:

- Install a large bus stop sign.
-
- Display route numbers and destinations.
-
- Use reflective materials for night visibility.
-
- Add route maps and schedules.

Bad Design: 3**Description:**

The pathway has separate entry and exit lanes, but people still have to cross each other near the gate. This makes the design less useful and causes confusion.

Source of Photograph:

Place:

VIT University, Vellore

Reasons why the design is bad:

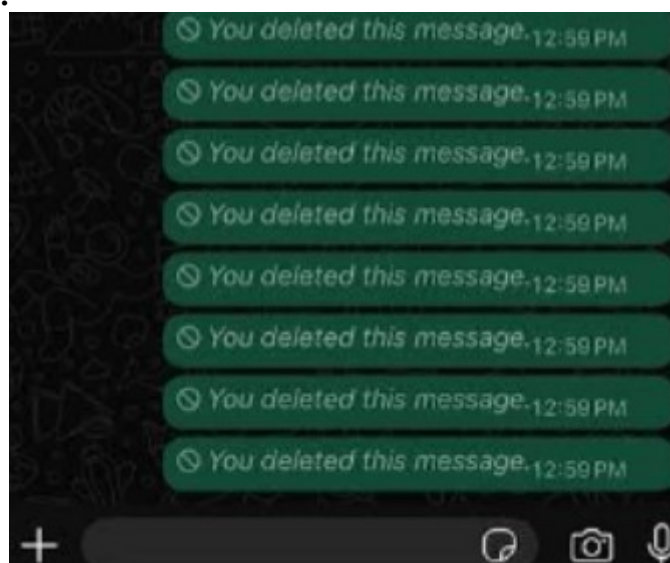

- Entry and exit paths meet near the gate.
-
- People have to cross each other.
-
- Causes confusion during busy times.
-
- Does not improve pedestrian movement.

Suggested Improvement:

- Make separate entry and exit paths until the gate.
-
- Add clear direction signs.
-
- Use barriers to guide people.
-
- Widen the pathway near the gate.

Bad Design 4: Delete for Everyone Notification**Description:**

Even after using "Delete for Everyone", the receiver still sees "This message was deleted.", creating unnecessary curiosity.

Source of Photograph:

Place:

WhatsApp Chat

Reasons why the design is bad:

- Creates unnecessary curiosity.
-
- Reduces user privacy.
-
- Clutters the chat.
-
- May cause misunderstandings.
-

Suggested Improvement:

- Remove the message without any notification.
-
- Add an option for silent deletion.
-
- Keep the chat clean and private.
